Workspace

just a moment, we're detecting if Citrix Workspace app is already installed.

If Citrix Workspace app is detected, you will see a window in a few seconds. Please choose **Launch Application**.

If app is not detected, no window appears. Then click **Download**.

Note: Clicking **Already installed** allows you to bypass running the client detection. However, you lose features like domain pass-through authentication, which requires the native Workspace app detection to complete successfully.
